Coated Paper Suitable for High-Quality Print Graphics Using Sheet-Fed Presses from Indonesia and the People's Republic of China: Continuation of Antidumping and Countervailing Duty Orders

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) and the U.S. International Trade Commission (ITC) have determined that revocation of the antidumping duty (AD) and countervailing duty (CVD) orders on coated paper suitable for high-quality print graphics using sheet-fed presses (coated paper) from Indonesia and the People's Republic of China (China) would likely lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time. Therefore, Commerce is publishing a notice of continuation of these AD and CVD orders.

DATES: Applicable [Insert date of publication in the *Federal Register*].

## SUPPLEMENTARY INFORMATION:

### Background

On November 17, 2010, Commerce published in the *Federal Register* the AD and CVD orders on coated paper from China and Indonesia.<sup>1</sup> On December 1, 2021, the ITC instituted,<sup>2</sup> and Commerce initiated,<sup>3</sup> the second sunset reviews of the *Orders*, pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act). As a result of its reviews, Commerce determined that revocation of the *Orders* would likely lead to the continuation or recurrence of dumping and countervailable subsidies and, therefore, notified the ITC of the magnitude of the margins and net subsidy rates likely to prevail should the *Orders* be revoked.<sup>4</sup> On June 7, 2022, the ITC published its determinations, pursuant to sections 751(c) and 752(a) of the Act, that revocation of the *Orders* would likely lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time.<sup>5</sup>

### Scope of the *Orders*

The merchandise covered by the *Orders* includes certain coated paper and paperboard<sup>6</sup> in sheets suitable for high quality print graphics using sheet-fed presses; coated on one or both sides

<sup>7</sup> One of the key measurements of any grade of paper is brightness. Generally speaking, the brighter the paper the better the contrast between the paper and the ink. Brightness is measured using a GE Reflectance Scale, which measures the reflection of light off of a grade of paper. One is the lowest reflection, or what would be given to a totally black grade, and 100 is the brightest measured grade.

U.S. Customs and Border Protection will continue to collect AD and CVD cash deposits at the rates in effect at the time of entry for all imports of subject merchandise.

The effective date of continuation of the *Orders* will be the date of publication in the *Federal Register* of this notice of continuation.
